

ONKAR NAMDEO ANDHALE

Java Full Stack Developer | Java | Spring Boot | REST APIs | Microservices | React.js | SQL | AWS
+91 9766427759 | onkarandhale.tech@gmail.com | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Java Full Stack Developer with **4.5+ years of professional experience** in designing, developing, testing, and maintaining scalable enterprise web applications using **Core Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, RESTful APIs, React.js, JavaScript, HTML5, CSS3, and SQL**. Experienced in developing secure and scalable backend services, integrating responsive frontend applications with REST APIs, implementing database-driven business solutions, and following **microservices, MVC, layered architecture, Agile, CI/CD, and clean coding practices**. Hands-on exposure to **Spring Security, JWT, Maven, Git, Docker, AWS, JUnit, Mockito, Postman, MySQL, PostgreSQL, Redis, and Apache Kafka**. Strong understanding of object-oriented programming, API development, database optimization, unit testing, debugging, code reviews, and production support.

TECHNICAL SKILLS

- **Programming Languages:** Java 8/11/17, JavaScript ES6+, TypeScript, SQL
- **Backend Technologies:** Spring Boot, Spring Framework, Spring MVC, Spring Data JPA, Hibernate, JDBC, RESTful APIs, Microservices
- **Security:** Spring Security, JWT, OAuth 2.0, Role-Based Access Control (RBAC)
- **Frontend Technologies:** React.js, HTML5, CSS3, JavaScript, TypeScript, Bootstrap, Responsive Web Design
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **Messaging & Integration:** Apache Kafka, REST APIs, JSON, API Integration
- **Cloud & DevOps:** AWS, Docker, Kubernetes, Jenkins, CI/CD
- **AWS Services:** EC2, S3, RDS, CloudWatch, IAM.
- **Testing:** JUnit 5, Mockito, Postman, REST API Testing, Integration Testing
- **Build & Dependency Management:** Maven, Gradle
- **Version Control:** Git, GitHub, GitLab, Bitbucket.
- **Development Tools:** IntelliJ IDEA, Eclipse, VS Code, Swagger/Open API.
- **Architecture & Design:** Microservices Architecture, MVC, Layered Architecture, REST Architecture, SOLID Principles, Design Patterns
- **Methodologies:** Agile, Scrum, SDLC, Code Review, Continuous Integration, Continuous Delivery

PROFESSIONAL EXPERIENCE

Smart Software Services Pvt Ltd.

Java Full Stack Developer

April 2022– Present

- Designed and developed scalable enterprise applications using **Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, and RESTful APIs**, following clean coding and layered architecture principles.
- Developed and integrated responsive web interfaces using **React.js, JavaScript, HTML5, CSS3, and Bootstrap**, consuming backend REST APIs for real-time business functionality.
- Implemented secure application features using **Spring Security, JWT authentication, role-based authorization input validation, and exception handling**.
- Designed and optimized relational database solutions using **MySQL/PostgreSQL**, including entity relationships, SQL queries, indexes, transactions, and JPA/Hibernate mappings.
- Participated in **Agile/Scrum development, code reviews, debugging, unit testing, Git-based version control, CI/CD activities, production support, and performance optimization**.

PROJECTS

1. FinEdge 360 — Digital Financial Operations Platform

Domain: Banking & Financial Services

Description: Enterprise-grade financial operations platform designed to streamline customer account management, transaction processing, payment workflows, and financial reporting. The solution uses a secure **Spring Boot microservices backend** with a responsive **React.js frontend** and database-driven business workflows.

Role & Responsibilities:

- Developed scalable **Spring Boot REST APIs and microservices** for customer management, account operations, transactions, and reporting workflows.
- Built responsive and reusable **React.js components** and integrated them with backend services using REST APIs and JSON.
- Implemented **Spring Security, JWT authentication, role-based authorization, validation, centralized exception handling, and secure API communication.**
- Designed database schemas and optimized **MySQL/PostgreSQL queries, JPA/Hibernate mappings, transactions, pagination, and indexing** for improved application performance.

2. ShopSpheres Nexus — Intelligent E-Commerce Management System

Domain: E-Commerce & Retail

Description: Scalable e-commerce management platform developed to manage products, customers, inventory, orders, payments, and business operations through a unified web application. The application follows a modular architecture with **Spring Boot REST services, React.js UI, secure authentication, and optimized database operations.**

Role & Responsibilities:

- Developed backend modules using **Core Java, Spring Boot, Spring Data JPA, Hibernate, and RESTful APIs** for product, inventory, customer, cart, order, and transaction management.
- Designed interactive **React.js** interfaces with reusable components, form validation, API integration, and responsive layouts for web users.
- Implemented **JWT-based authentication, Spring Security, RBAC, request validation, exception handling, and API-level security.**
- Performed **unit testing, API testing, debugging, code reviews, Git-based source control, Docker containerization, and CI/CD integration** to improve application reliability and deployment consistency.

EDUCATION

Master of Computer Science (MCS)

Savitribai Phule Pune University | 2023

Percentage: 70.65%

Bachelor of Computer Science (BCS)

Savitribai Phule Pune University | 2021

Percentage: 79.50%
